- ADA compliant hotel room signage with tactile numbering and corresponding braille available.
- Wood grain will vary
- Specifications subject to change

It's a 3 sided box, which has been carefully deconstructed to a sculptural state. The careful composition of overlap and void create interest and complexity to a very straightforward, well-functioning wall sconce. The tectonic disconnection in form allows you to witness the solid American black walnut's grain as it travels through each solid block.
