

Allegro, suspension design Atelier Oï 2009

FOSCARINI

Allegro is an entire family of hanging lamps that take on their shape thanks to the force of gravity, created with metal lines that design the light and emit sounds when they touch. The collection name is inspired exactly to this "musicality". There are three versions, according to the finish of the metal elements, to express three different styles: Allegro Ritmico in graphite, Allegro Vivace in copper and Allegro Assai in gold. Their king size make them perfect to feature large public and private spaces, with a diffused downwards light that reflects off the ceiling.

FOSCARINI

Description

Suspension lamp with diffused, direct and indirect light. The lamp consists of a chromed metal frame and epoxy powder coated full aluminium rebar rods. The rods are anchored to the mount using small metal rings. Fitted with three stainless steel suspension cables and a transparent electrical cable. Ceiling rose with galvanised metal bracket and glossy chromed metal cover. Designed to accommodate the separate lighting of the two light sources. Canopy decentralisation kit available.

FOSCARINI

Atelier Oi

The tr(o)i)ka was founded by Aurel Aebi, Armand Louis and Patrick Reymond in La Neuveville, Switzerland, in 1991 under the label Atelier Oi. The main elements that characterise the atelier's philosophy and work consist of its multidisciplinary nature. Orders come from the fields of architecture, design and scenography, and, most frequently, from between these different disciplines. Invited to various design schools in Switzerland and abroad, they hold a teaching position in the design department of Ecal (University of Art and Design Lausanne, Switzerland).
