

# Solar, outdoor design Jean Marie Massaud 2011

FOSCARINI

Solar is a luminous hemisphere. Created out of polyethylene, the lamp is set on the ground and covered by a circular plane that screens the light and works concurrently as a resting surface. Designed for indoors and out, Solar is in harmony with a broad-ranging concept of living, in which the garden can become a living area. Not just a lamp but a new type of object, a contemporary hearth around which to gather and chat, at home or outside. In the indoor model, the resting surface is slightly concave, with its edges just slightly raised. The outdoor version instead has a

straight resting surface that is flush with the outer edge, to allow the rain to just slip away. The surface finishes are also different: glossy white or dark wood for the indoor version, with a characteristic textured effect for the outdoor version. Decorative on its own or arranged in a composition of multiples, Solar has a retractable base that allows you to incline it in order to change the lighting effect while remaining perfectly stable. A bright, warm and intimate centre of attraction, Solar is ideal for scenic compositions, such as a large hall or in the

garden, to create suggestive light paths.

## Description

Floor lamp with diffused and direct down light. Rotational moulded polyethylene diffuser, porcelain stoneware top shelf, polyester powder coated zinc alloy die cast base. Adjustable light with an inclination up to an angle of 15° with respect to the supporting surface. Electrical cable covered in neoprene for outdoor use without switch on the cable, equipped with stare-mount.

**Materials** Rotational moulded polyethylene, porcelain stoneware top shelf

**Colors** brown

## Brightness light

semi-diffused and direct down light

## Model

Solar

## Weight

net lbs: 25,79  
gross lbs: 38,14

## Packaging

vol. cub. ft.: 7,522  
n. boxes: 2

## Bulbs

LED Retrofit/Fluo 1x26W E26

## Cable length

## Certifications

Inclinabile fino a 15° Suitable for wet locations
