Tress, suspension design Marc Sadler 2009

FOSCARINI

The seduction of a woman's tress wash te initial inspiration for the Tress family of lamps. This design-come-true by Foscarini was achieved through the development of a completely original technological process, involving a fiberglass and resin tape woven with oredrly casual ness to become the structure anda aesthetics of the lamp. Tress changes personality according to its color: it is light and discrete in white, strong and decisive in black and volcanic and totemic in red, which makes the contrast between the interior and the exterior even more evident, surprinsing in indigo blue and extremely contemporary in greige, a shade between grey and beige. The mini, small and medium size of Tress hanging version has been designed to illuminate a specific area of the space below; on the other hand the big size is characterized for a more widespread light diffusion. All sizes can be used alone, to enhance a shadowy corner, or any other space in a room, or it can be used in line to create effects of perspective.

Tress, suspension technical info

FOSCARINI

Description

Suspension lamp with diffused and direct light. The fibreglass-based composite material diffuser is produced by modelling tape along a mould with an automatic control of the pitch/pattern, which is then liquid coated. In the large version, blown glass internal diffuser with acid etched finish, satin finish opaline glass upper screen and chromed metal frame, in the other versions chromed metal mount. Fitted with three stainless steel suspension cables for the large version, one for the other versions, and transparent electrical cable. Ceiling rose with galvanised metal bracket and glossy chromed batch-dyed ABS cover. Canopy decentralization kit - multiple canopy available (up to 6 or 9 suspension lamps).

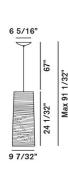

Materials Coated fibreglass-based composite material, chromed metal and aluminium.

Colors white, black, crimson, indigo, greige

Brightness light semi-diffused and direct down light

Tress, suspension multiple composition

FOSCARINI

Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case. The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.
