## Elements XL Pendant

Note Design Studio is exercising its fascination with the Nordic mountains and the region's light once again, creating a riff running from dawn to dusk and midday to the midnight sun in the form of the Elements XL pendant. Standard colors for this family of textile fixtures are blue and white but other colors are available upon request. The Elements pendant also comes in a Small and Large version.

### Ordering Matrix

#### Model

8330501 = (White)
