

Rain, Design by Andrea Tosetto

Model Rain

Rain falls from the ceiling like a drop of spring rain, with a linear movement that accentuates the curvaceous conical forms of its body. A metal suspension lamp with an LED light source projected toward a convex lens—simple and effective, elegant and extremely bright, to be used either independently or as a design composition.

Ecodesign Regulation

The light source contained in this device must only be replaced by the manufacturer or by the latter's assistance service or by equally specialised personnel.

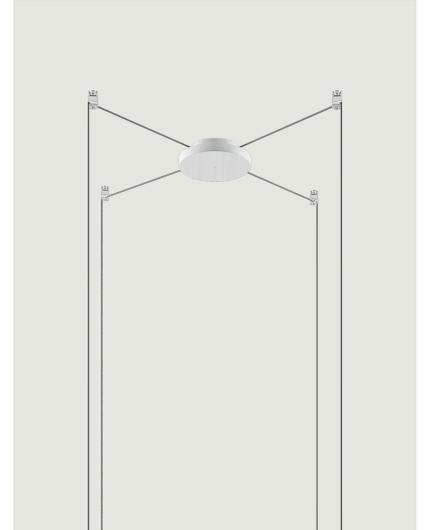

Cluster suspension lamps must be installed on a *canopy*: find out more on lodes.com/en/canopies

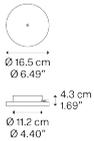

Radial System

Model Up to 4 Lights Radial

Lodes's radial system is an innovative structure which allows to manage different individual suspension cables separately starting from one canopy. This system is, therefore, useful for building multiple ceiling or wall compositions with an unusual shape or to increase the potential of a single wall or ceiling light point. It also allows to efficiently and elegantly illuminate irregular ceilings or with beams.

● Matte White – 9010

● Matte Black – 9005
