

Random,  
Design by Chia-Ying Lee

### Model Random

A lightweight, blown glass suspension lamp, Random is made up of three round diffusers of different sizes which form one simple, eye-catching whole. Each diffuser has an LED light source which emits a soft white light. When grouped together on a cluster, Random light fixtures form a poetic composition like soap bubbles, enhanced by the contemporary finishes which add a touch of character and originality.

## Radial System

### Model Up to 4 Lights Radial

Lodes's radial system is an innovative structure which allows to manage different individual suspension cables separately starting from one canopy. This system is, therefore, useful for building multiple ceiling or wall compositions with an unusual shape or to increase the potential of a single wall or ceiling light point. It also allows to efficiently and elegantly illuminate irregular ceilings or with beams.
