

Spider, Design by Andrea Tosetto

Model Spider

Spider is a round suspension lamp resembling an eye that can look into any part of the room. By adjusting the angle of the diffuser, the light beam emitted by the LED light can be directed towards any specific point. When installed on the different clusters available, it can create numerous lighting patterns, from functional to decorative, which can be dimmed at will. Available also as ceiling light. In *Spider*, the simplicity of the looks underscores the versatility of its performance.

Rectangular Cluster System

Model 7 Lights

Lodes's multiple rectangular canopy (*Rectangular Cluster System*) is a ceiling suspension system in the form of a parallelepiped. It is a decorative element fitted with a variable but predefined number of holes and used to create more or less large compositions which offer different hanging possibilities based on the type of space and ceiling.
