

Metal Glass, suspension design Diesel Creative Team

Born from a union between the centuries-old blown glass tradition and the industrial appeal of metal, there is something of the alchemist's still or a lantern in a Gothic novel about Metal Glass.

It is as magical in its shape as it is in its lighting effect with a dense and almost opaque transparency achieved by provoking a chemical reaction in its still-incandescent vitreous paste. This creates a myriad of bubbles, called "puleghe" in Venetian dialect, which is the origin of this quasi-magical material's name, "vetro pulegoso". When the lamp is switched on these "puleghe" are transformed into luminous particles which contrast with a white light shining inside its central cylinder.

Metal Glass is available in four vintage-inspired colours and two versions, suspension or table.

Metal Glass suspension multiple composition

Description

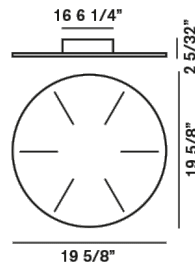

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case.

The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.

Materials: Lacquered metal

Colours: White

Multiple canopy

Weight

net lbs: 19,18
gross lbs: 22,05

Packing

vol. cub. ft: 1,059
n.boxes: 1
