FOSCARINI

Planet is the result of Foscarini's ongoing exploration of the universe of materials and its desire to overcome the challenge of creating a fabric lamp without a frame inside. The idea, which sprang from a study of "smart clothing" for astronauts, commissioned by NASA and conducted by Dainese in conjunction with the MIT, was to use a fabric borrowed from the sailing world. Due to its texture and sewing process, this fabric would provide the frame of the lamp. Planet is actually the joining of three pieces of this high-tech fabric, handsewn, onto which an

external embroidery is applied, acting both as decoration as well as a support. Depending on the color of the embroidery, the personality of the lamp changes. In the red version, the special thread supporting the lamp creates a pattern that stands out on the white fabric. In the white version, the embroidery creates a precious yet discreet ton-sur-ton effect, a slight weft when the lamp is turned off, that turns into a back-lit decoration when the lamp is turned on. Innovative and familiar, pleasantly organic rather than cold and geometric, Planet distinguishes its setting

with irresistible appeal, unprecedented presence and warm, cozy and welcoming luminosity. Available in two different sizes, it is ideal for use in several rooms throughout the home or in contract settings.

## Description

Suspension lamp with diffused light. Diffuser made of Polyethylene terephthalate, a material that is normally used to make clothing or sails, nylon embroidery cord. The manufacturing process envisages the stitching of various pieces of fabric, designed and cut for this purpose, to form a spherical volume. Epoxy powder coated metal mount, stainless steel suspension cable and transparent electrical cable. Ceiling rose with galvanized metal bracket and glossy white batch-dyed ABS cover. Canopy decentralization kit available.

**Materials** polyethylene terephthalate and nylon

**Colors** white, red

**Brightness** light  
diffused light

## Model

### Planet large

### Weight

net lbs: 5,52  
gross lbs: 15,43

### Packaging

vol. cub. ft.: 10,454  
n. boxes: 2

### Bulbs

halogen 1x150W E26 medium type

LED Retrofit/Fluo 1x26W E26

### Certifications

### Planet small

### Weight

net lbs: 4,41  
gross lbs: 10,58

### Packaging

vol. cub. ft.: 3,815  
n. boxes: 2

### Bulbs

Halogen 1x100W E26 medium

LED retrofit/FLUO 1x20W E26

electronic ballast multiwatt 26/32/42

### Certifications

## Changedesign

Changedesign is a multidisciplinary studio made up of a group of designers from different countries working in industrial, interior, trade, retail and fashion design. Founded and directed by Renato Montagner, it has two offices: Venice and Milan. It has worked in partnership with Dainese, Invicta, 55DSL, Fiat and Louis Vuitton.
