Elements XS Pendant

Design by: Note Design Studio

Note Design Studio is exercising its fascination with the Nordic mountains and the region's light once again, creating a riff that is relevant at dusk, midday and right up to the midnight sun's appearance! This improvisation takes place within the Elements family of fixtures, which includes the Elements XS pendant. Who can blame the design visionaries for this mild obsession given the glittering lakes and dense wildernesses that make up the area's geography? Standard colors for this fixture are white, black and gray; however, custom colors are available upon request.
