

Jacco Maris

Solo Pendant

Jacco Maris' Solo pendant is named after his beloved dog, a wandering hound he found near Pompeii whom he calls an Italian wonder-dog! The paw print on the fixture is Solo's signature! The material is either bronze or aluminum. The body in aluminum is powder coated in three available colors: anthracite, silver and white. The bronze body is patinated in brass. The fluorescent reflector provides a diffused light and the fixture is available in three sizes—60 cm, 100 cm and 140 cm—the largest of which is available with a dimmable fluorescent tube.
