design elio martinelli, 1987

The Biconica Floor Lamp designed by Elio Martinelli in 1987 provides indirect light.

The body of the fixture is molded resin, painted in **white, black** or **gold** color.

The lamp was created by the vacuum generated by a ring of nearly tangent circles, forming a canal that connects the two worlds: the old and the new millennium. The neoclassical form allows the inclusion in any type of environment and small size is not an issue for its location.
