

BASALT

Evoking nature's magnitude

Drawing from millions of years of organic construction, the Basalt range references the shape found in the thousands of extruded basalt columns that make up the Giant's Causeway in Northern Ireland.

Through expertly crafted Brass and Stainless Steel, together with mouth-blown borosilicate glass, Basalt achieves a truly unique aesthetic to accompany its arcane origin story.

- Crafted from sand casted Brass and lost-wax casted Stainless Steel
- Matte glass translucent borosilicate glass bulbs
- Consistent color rendering of more than CRI 90
