EN Trypta adapts perfectly to any space thanks to two separately activated light sources connected to the extremities of a central column, to provide both direct and indirect lighting. Its decorative character is underscored by the panels clad in flame-retardant knit fabric, giving Trypta a unique personality.

FR Trypta s'adapte parfaitement à tout environnement grâce à deux sources lumineuses à allumages séparés situés aux extrémités du corps central, qui diffusent la lumière de manière directe et indirecte. Son caractère décoratif est souligné par les panneaux recouverts d'un tissu en maille ignifuge qui lui confèrent personnalité et originalité.

ES Trypta se adapta perfectamente a cualquier ambiente gracias a dos fuentes de luz con encendidos independientes situados en los extremos del cuerpo central, capaces de proporcionar una difusión de la luz tanto directa como indirecta. Su carácter decorativo está subrayado por los paneles revestidos de tejido de punto ignífugo, que le dan personalidad y singularidad.

Opal 10V + mosaic e Tiny
In questo progetto, è stato applicato direttamente su Folio, il mosaico in vetro realizzato dall'azienda Trend Group SPA. La retroilluminazione risulta perfettamente omogenea, intensa e mette in risalto tutte le cromie del mosaico.
La luce perimetrale sulla parete, realizzata con il nostro profilo LED Folio Tiny, conferisce ancora più eleganza incorniciando il prodotto.

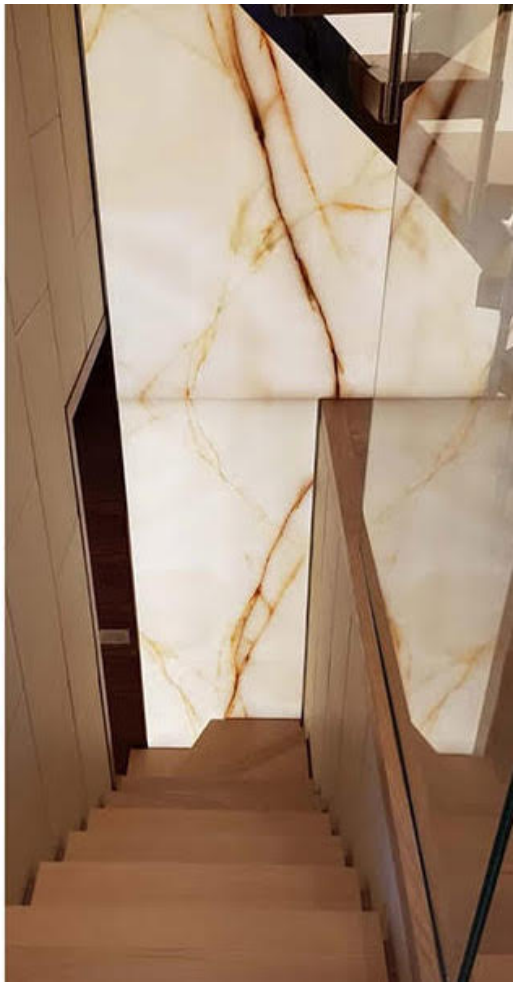

Opal 10V + mosaic and Tiny
In this project, the glass mosaic, realized by the company Trend Group SPA, has been fixed directly on the Folio panel.
The backlighting results perfectly homogeneous, intense and emphasizes all the mosaic's colors. The perimetral light on the wall, realized tith our Folio LED profile Tiny, award much more elegance to this product.

Parc Collection

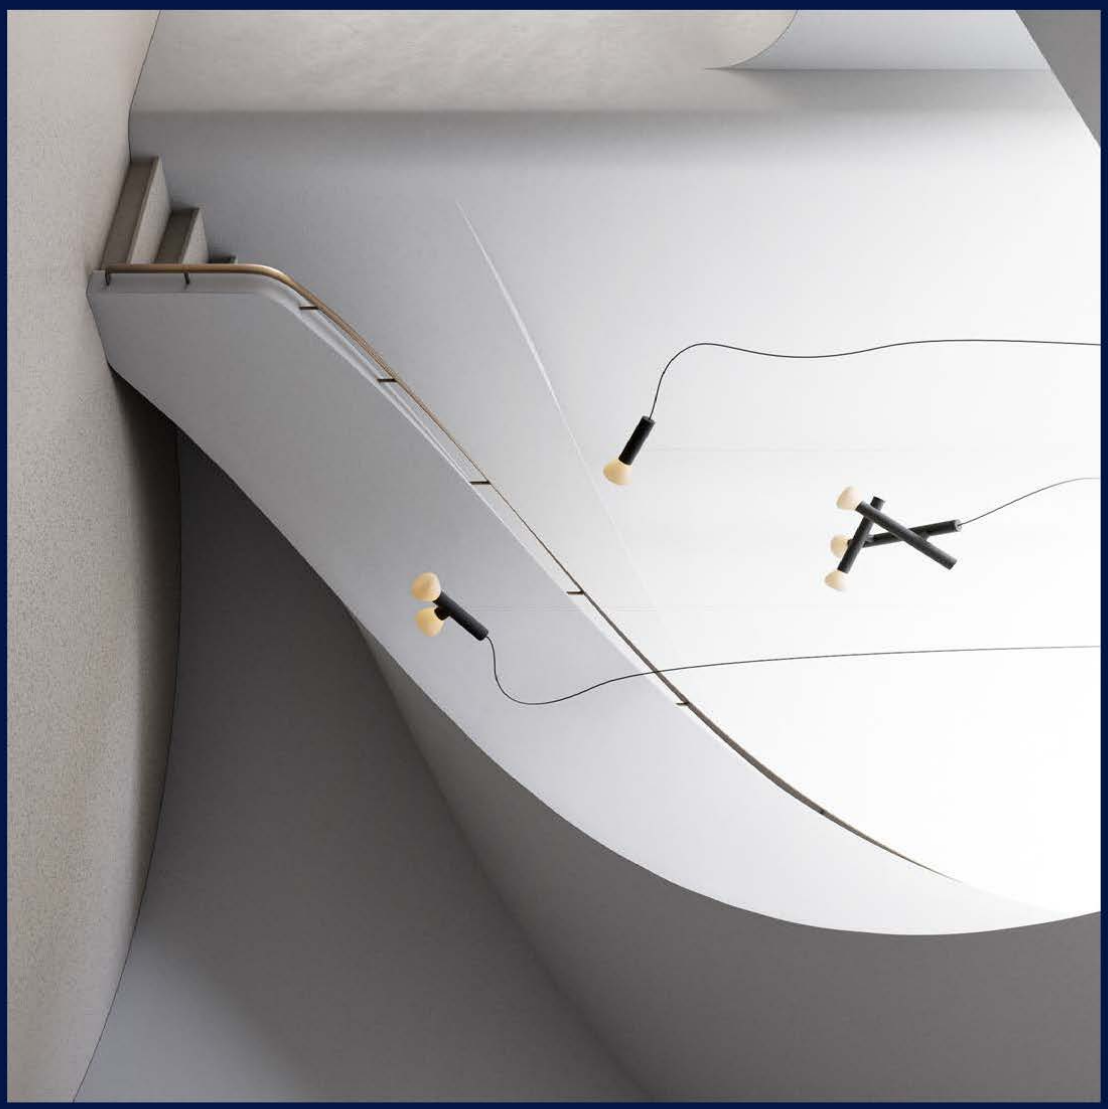

Parc is a collection inspired by childhood imagination and the essentiality of homemade forms—created in collaboration with Swiss designer Adrien Rovero. Evoking the archetype of a flashlight, each lamp of the Parc Collection is a playful reminder of time spent in nature, when a simple tube and piece of string could be used to fashion any number of creations. These makeshift things, at once naive and functional, harness the unique beauty of peeling an object back to its essence.

Hutchison Collection

Hutchison is the thoughtful study of softs curves and hard lines—a rivalry of vertical and horizontal forces and a play of scale and repetition. Alone, it self-defines as a frank, decorative pendant light. In multiples, it evokes the iconic patterns of Middle Eastern archways and Roman terracotta roofs.

Clark Collection

Clark Collection

Molteni & C, New York

The Clark Collection pushes the limits of form without sacrificing functionality. Cut and bent metal create shades that both block and reflect the lamp's light source, casting an even wash of light on any surface. Marble is used not only to anchor the lamps, but also to provide a contemporary touch to its surrounding environment.

Waldorf Collection
Molteni & C, New York

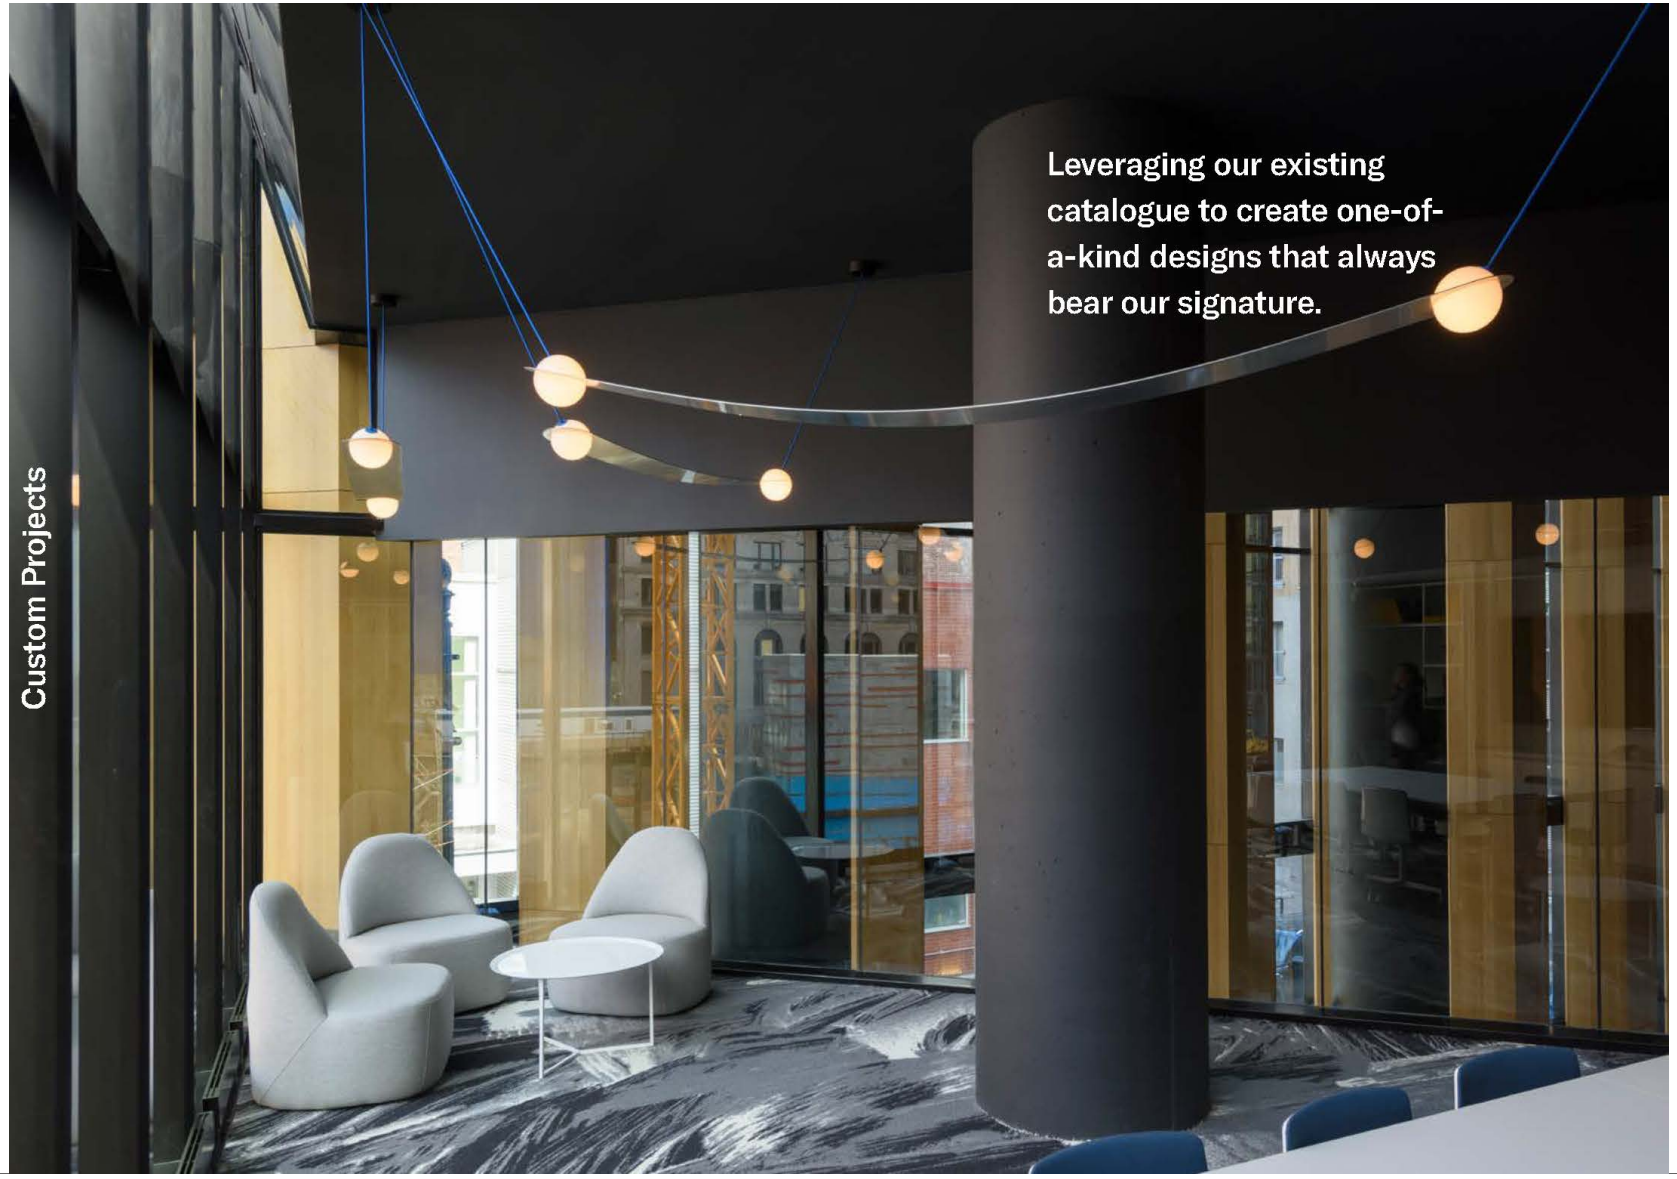

Waldorf Collection

Kinfolk, Copenhagen

The main feature of the Waldorf Collection combines an open hemi-spherical shade with a cylindrical socket cover. This composite shade is deployed in suspension and wall-mounted configurations with natural brass and powder coated rods. Swivelling shades and other moving parts add functional flexibility to the crisp, streamlined forms of this collection.

SOLUTIONS FABRIC *XOREL*

6821-160PRISM | 6808-88 DASH^ | 6808-80 DASH^ | 6808-29 DASH^

6808-27 DASH^ | 6819-92 QUARRY | 6819-99 QUARRY | 6428-802 STRIE^

6427-708 METEOR | 6427-720METEOR | 6427-721METEOR | 6427-226METEOR

XOREL is a woven polyethylene textile from Carnegie Fabrics. DASH and STRIE selections are made primarily from sugarcane, representing the worlds first plant-based high performance interior textiles.

Technologically advanced and environmentally sustainable, Xorel requires low energy to manufacture and has no chlorine content, plasticizers or heavy metals. Nothing is added to the woven Xorel product to enhance performance. All its properties :durability, cleanability and colorfastness are inherent to the yarn itself. Most stains can be removed simply with a cloth dipped in hot water. Xorels anti-bacterial, anti-fungal and antistaph nature and its ability to prevent bacterial strike-through make it an ideal shade material for hospitals, hotels, and other public applications.

RESOLUTEs twelve standard ready-to-ship fabric selections are photographed on a Prosperity D2 lit by a dimmed 14W LED array. Most other unbacked Xorel fabrics can be accommodated on a custom basis.

Environmental qualities:
- MBDC Cradle to Cradle certified Gold (*) or Silver
- No added finishes or dyes, chlorine free, emits low VOCs
- No harmful chemicals into landfills
- Longer service life = reduced waste stream
- 100% recyclable, can be incinerated

Material qualities:
- Water repellent
- Anti-bacterial, stain resistant, easily cleaned
- Colorfast, solution dyed; doesn't pill or fuzz
- Extremely durable, dimensionally stable
- Inherently flame retardant

NARA

"Wood is universally beautiful to man. It is the most humanly intimate of all materials." Frank Lloyd Wright

Softly lucent, Nara's glow permeates layers of sustainable and recyclable materials: an FSC certified marine grade okoume plywood shell enrobed in natural kraft paper-wrapped steel wire and bio-based Xorel fabric from Carnegie.

Nara's luminescence emanates from a wholly enclosed 32W light engine; Nara emits a 3 to 1 ratio of downlight to uplight.

A variety of stain finishes are available for both wood and paper-wrapped wire to complement a wide range of fabric options.

The fixture is hung by stainless steel aircraft cable, with clear jacketed electrical cord.

Click to learn more about Nara.
